EDUCATION

Asian College of Higher Studies, *Lalitpur*   *2022-present*
B.Sc. CSIT

SKILLS

- Proficient in Python, SQL, and Microsoft Excel for data analysis.
- Experience with data visualization tools such as Power BI.
- Strong understanding of statistical methods and techniques.
- Excellent problem-solving and critical thinking skills.
- Strong attention to detail and ability to work with large datasets.

Python: NumPy, Pandas, Matplotlib, Seaborn.

PROJECTS

Tihar Sales Analysis

- I oversaw a Python data analysis project that examined Diwali sales patterns. For this project, sales data from various sources were gathered, refined, and then thoroughly exploratory data analysis was done to find trends and insights.

Sales Analysis Project

- I created an interactive dashboard in Power Bi to analyse online sales data. I created connections, join tables and perform some calculations to manipulate data for visualizations.

Credit Card Transaction Analysis

- I created a comprehensive weekly credit card dashboard that offers real-time information on KPIs and trends and supports data-driven decision-making by providing easy access to relevant information.
- The dashboard will give stakeholders the ability to efficiently track and evaluate credit card operations.

Bank Loan Analysis Project

- It provides a comprehensive and user-friendly interface for accessing vital loan data and serves as a one-stop solution for users seeking detailed insights into our loan portfolio, borrower profiles, and loan performance.
- It provides a high-level summary of the bank's loan portfolio and monitors the performance of individual loans and assess risk.

CERTIFICATIONS

- Advanced Python with Django, Mindrisers
